

NEMESIS Version 3 Implementation Meeting

August 20-21, 2018

Silver Baron Lodges, Park City, Utah

Workgroup: Finalizing Revisions to eDisposition.12

Approved Decisions:

1. eDisposition.12 will be deprecated and replaced with "Option 3"

Work Group Questions:

1. Review of Chip Cooper/David Saylor narrative (attached on website)

- a. Questions highlighted in RED, responses in BLUE

- i. Changes to Incident Disposition?

1. Change Incident Disposition --> Unit Disposition

Unit Disposition

2. Remove "Integrated Health Care" option
3. Change "This Agency" to "This Unit"

- ii. Changes to Patient Disposition?

1. Remove "Integrated Health Care" option

- iii. Changes to Transport Disposition?

1. Remove "Transport BY another Agency's unit"
2. Change "This Agency's Unit" to "This Unit"
3. Change "In Another Agency's Unit" to "In Another Unit"
4. Change "To another agency's unit" to "To another unit"
5. OR ----In Transport Disposition, consider replacement terms for:

- a. Transport in THIS Agency's Unit
- b. Transport in ANOTHER Agency's Unit
- c. Transport BY Another Agency's Unit

d. Transport TO Another Agency's Unit

2. Lets run through some use cases:

- a. Call cancelled in route
- b. No patient found
- c. Patient refused care
- d. AirMed will transport the patient
- e. You are AirMed transporting the patient
- f. Integrated health care encounter
- g. Pt. died before or after care
- h. Pt. needs transport to dialysis center
- i. A fire department arrives on scene and begins treating the patient. The transporting agency arrives, but the fire department DOES NOT RELEASE patient care. The transporting agency takes the firefighter and patient to the hospital without taking over patient care. It should be clear that although the transporting agency is transporting, and may assist with patient care, they are not in charge of the patient. I'd like both sides of this scenario (fire department and transport agency) to be addressed.
- j. BLS responder arrives on scene and treats patient. ALS responder arrives and assesses the patient (ALS intercept) and allows the patient to be transported via BLS. This scenario is important from a billing standpoint.

3. What additional materials/tools should be developed to ease the burden associated with the reformulation of eDisposition.12? [Additional time is needed to address this question.](#)
