New State EMS Data Managers:

On August 11th, we are hosting a “NEMESIS Boot Camp” in association with the Annual NEMESIS Version 3 Implementation Meeting in Park City, Utah! This is your chance to learn about “all things NEMESIS”...and become agile with the many tools that the NEMESIS TAC provides to increase your efficiency and effectiveness as a State EMS Data Manager. You will receive “hands-on” experience with the NEMESIS V3 Cube, StateDataSet, Tableau Reports, EMS Service Area Builder and “Tips and Tricks” to lighten the burden associated with daily V3 data and administration requests.

State EMS Data Managers:

On August 12th and 13th, are hosting the Annual NEMESIS Version 3 Implementation Meeting. **I am writing to request your attendance!** With an approved Version 3.5.0 Data Standard, it is now time to finalize the technical specifications and implementation policies that ensure effective and efficient uptake within your State and the EMS agencies that you serve. Without your voice, it becomes difficult to guarantee we are meeting the specific needs of your State, EMS professionals and citizens.

The public value of State and National EMS data is growing on many fronts including; understanding the opioid epidemic and, surveillance for natural disasters and infectious disease outbreaks. We consider this the most important meeting that you could attend to ensure your voice is represented in the decisions that will guide the rollout and implementation of the NEMESIS 3.5.0 standard.

Please join us.

Sincerely,

N. Clay Mann, PhD, MS, MBA
Professor, P.I. NEMESIS Technical Assistance Center
University of Utah School of Medicine, Dept. of Pediatrics
