

# 2020 PUBLIC-RELEASE DATASET **NOW AVAILABLE**

**43,488,767** EMS Activations  
**12,319** EMS Agencies  
**50** States and Territories

The National Emergency Medical Services Information System Technical Assistance Center (NEMESIS TAC) today announced the availability of the 2020 Public-Release Research Dataset, the largest publicly available dataset of emergency medical service activations in the United States. With this release, NEMESIS aims to improve understanding of, confidence in, and support for EMS data collection and analysis that will lead to data being utilized more effectively to improve patient care.

The 2020 Public-Release Research Dataset is a subset of the National EMS Database that is the repository for EMS data collected from U.S. States and Territories. NEMESIS maintains the national standard for how patient care information resulting from an emergency 9-1-1 call for medical assistance is collected. The dataset includes 43,488,767 EMS activations submitted by 12,319 EMS agencies servicing 50 states and territories.

Those interested in requesting a copy of the 2020 Public-Release Research Dataset can contact the NEMESIS TAC and fill out a request form at their website <https://nemsis.org/using-ems-data/request-research-data>. A password-protected USB drive containing the dataset, the 2020 NEMESIS Data User Manual, NEMESIS Data Dictionary v3.4.0, Extended Data Definitions v3.4.0, and sample SAS code file will be sent via postal service.
