

April 21, 2023

Dear NEMSIS Stakeholders,

Thank you for being a champion for EMS services in your state/territory/region. We know your constituents have asked a lot of you since the COVID pandemic and we appreciate your dedication to EMS services.

The NEMSIS Technical Assistance Center (TAC) team would like to personally invite you to attend the NEMSIS Annual Meeting August 22 – 24, 2023, in Park City, UT. This meeting is not a traditional conference but is designed to be a “work meeting” with robust discussion, input from all stakeholders, and consensus building for key EMS data collection and utilization initiatives.

We are aware there are many challenges faced by EMS services across the nation, and understand how evidence-based prehospital emergency medical care data continues to inform many pressing issues including: data collection and utilization, EMS workforce concerns, system response and resources, evaluating performance, and alternative EMS funding models.

The objectives of the NEMSIS Annual Meeting include:

1. Network with other state/territory data managers
2. Meet and address concerns with ePCR software vendors that serve your jurisdiction
3. Discuss and build consensus on the NEMSIS v3.5.1 data standard revision
4. Refine materials to energize your v3.5 transition plan among your EMS stakeholders
5. Learn about resources and tools from NEMSIS that can assist you in your data collection efforts

Overview of Meeting Schedule:

- Tuesday, August 22, 2023: State Data Manager Forum (previously known as Boot Camp), NEMSIS Advisory Board meeting, and the Data Interoperability Connect-a-thon for Software Vendors
- Wednesday, August 23, 2023: General Session Meetings
- Thursday, August 24, 2023: General Session Meetings

The NEMSIS Annual Meeting is an opportunity to ensure that your needs and concerns are represented in national EMS data initiatives.

We consider this the most important meeting you could attend as we move toward national implementation of the NEMSIS v3.5 standard. We are committed to improving the National EMS Data Standard in partnership with you and look forward to visiting with you. Please join us!

Sincerely,

A handwritten signature in black ink, appearing to read "N. Clay Mann", written over a circular scribble.
