NEMSIS v3 Versioning Timeline

The NEMSIS TAC is receiving v3.5 data.

At the request of State Offices of EMS, the sunset date for v3.4 data was extended by 12 months to January 2024.

States are encouraged to implement the v3.5 data standard as soon as they are able. EMS software vendors continue to develop products to support the v3.5 standard.

Access the updated NEMSIS versioning timeline here: https://nemsis.org/v3-5-0-revision/when-will-changes-take-place/

Website Changes

The most recent website changes are:

The American College of Surgeons revised the 2011 Trauma Triage Criteria and established the 2021 National Guidelines for Field Triage of Injured Patients. NEMSIS created a Infographic with a cross-walk for eInjury.03/eInjury.04 updating to the 2011 criteria.

The v3.5 Critical Patch #4 updating eInjury.03 and eInjury.04 to the 2021 Trauma Triage Criteria is also available on the NEMSIS website.
v3 Data Submission

The NEMSIS TAC collaborates with Vendors and State EMS Data Managers to resolve state-related data quality issues under both the v3.4 and v3.5 data standards. The current national failed submission rate is 0.63%.

NEMSIS Participation

The NEMSIS state map shows the progression of states and territories as they transition to the version 3.5 data standard. When a state or territory submits version 3.5 resources to the NEMSIS TAC, the state color is updated. We congratulate the twelve states that are submitting v3.5.0 data.

Access to the interactive state map is located on the home page of the NEMSIS website at: https://nemsis.org/state-data-managers/state-map-v3/

EMS by the Numbers: Impact of COVID-19

The EMS by the Numbers Dashboard* is updated weekly with current data in an effort to help State EMS Officials track particular EMS activations occurring during the COVID-19 pandemic.

Interested parties can access the latest PDF version of the EMS by the Numbers report by visiting the NEMSIS website here: https://nemsis.org/ems-by-the-numbers-impact-of-covid-19/

The EMS by the Numbers Dashboard is a tool to provide State/Territory EMS Data Managers with a broad overview of their EMS responses using nationally submitted data which allows them to observe trends in their State/Territory.

Access the dashboard here: https://nemsis.org/view-reports/state-reports/version-3-state-dashboards/state-ems-by-the-numbers/ *This dashboard is only available to authorized state users.

NEMSIS User Accounts

The NEMSIS User Accounts policy has been updated to reflect new security standards. The User Accounts are now set to expire after 6 months of inactivity, and users need to reset their passwords every 90 days. States and Vendors are responsible for maintaining who they have authorized for access to their restricted data by notifying the TAC when a User Account needs to be deactivated. If you are unable to log into the Tableau dashboards, please submit a help desk ticket here: https://nemsis.atlassian.net/servicedesk/customer/portals

v3 Data Use Agreements

We encourage states preparing for the v3.5 transition to approve the v3.5 DUA's early in the transition process. Find the document here: https://nemsis.org/wp-content/uploads/2023/02/NEMSIS-v3.5.0-DUA-revised-2.23.2023.pdf

Additional help with the DUA process is available from the NEMSIS TAC by submitting a Help Desk Ticket and choosing General NEMSIS Questions from the options. You may also contact the law firm Page, Wolfberg and Wirth, LLC with questions regarding the v3.5 DUA.

Request for 2022 Data

Closure of the 2022 Public-Release Research Dataset

The TAC is grateful to all state data managers and vendors for the successful submission of patient care records (PCR's) completed during 2022. The TAC received over 53 million PCR's into the national repository. The TAC will make a public announcement when the 2022 Public-Release Research Dataset is available to EMS stakeholders.
