Overview

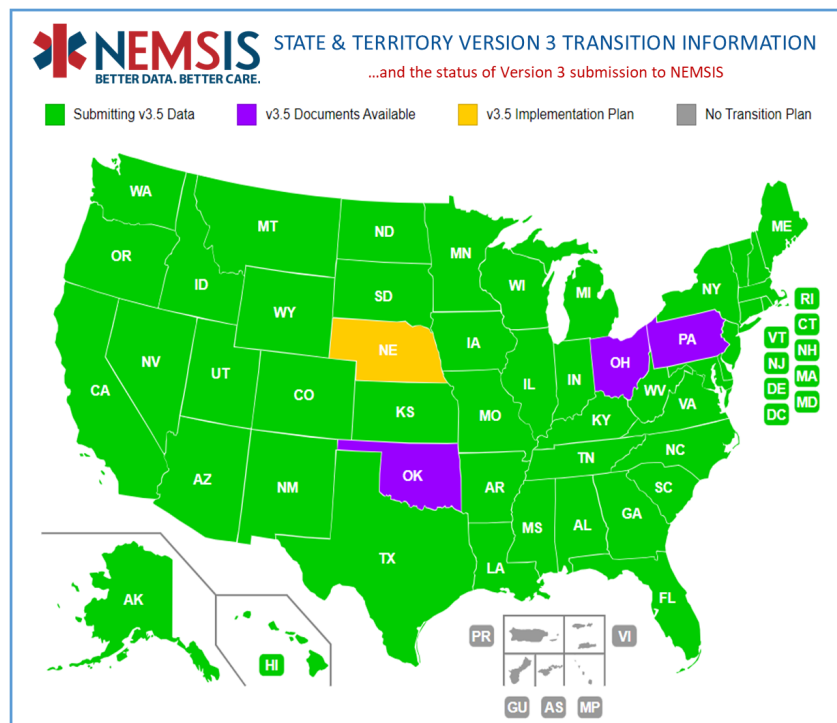

This report presents highlights of work, collaboration, and initiatives the NEMMSIS Technical Assistance Center (TAC) Team has focused on during the month. It is not an all-inclusive task list but rather an insight into major projects with which the TAC team is engaged.

NEMMSIS Data Submission Participation

The TAC continues to encourage states and vendors to implement the v3.5.0 data standard as soon as possible. We are ready and available to provide assistance regarding any v3.5.0 implementation delays.

The NEMMSIS map shows the progression of states and territories as they transition to the version 3.5.0 data standard. When a state or territory submits v3.5.0 resources to the NEMMSIS TAC, the color is updated. We congratulate the forty-six states that are submitting v3.5.0 data.

Access to the interactive map is located on the home page of the NEMMSIS website at: <https://nemsis.org/state-data-managers/state-map-v3/>.

NEMMSIS Collaboration

NEMMSIS/NAEMSO Agenda Items from the DMC Meeting:

The NEMMSIS TAC team meets monthly with the NAEMSO Data Managers Council (DMC). The June 18, 2024, agenda items included:

- A request for state managers to nominate up to three people they believe are making an impactful difference in EMS. The NEMMY Award will be presented at the NEMMSIS Annual Meeting.
- A collaboration with ImageTrend on a new MVC Project.
- Addition of a Vendor Breakout Time during the V3 Implementation Calls. This time is set aside for state managers to address questions and discuss solutions for common issues or concerns.
- NEMMSIS is collaborating with key stakeholders to determine dataset elements for a Mobile Integrated Healthcare - Community Paramedicine initiative.

*Duplicates are removed.

NEMESIS Annual Meeting

The NEMESIS Annual Meeting Registration site is open!

We kindly request your attendance at the NEMESIS Annual Meeting. The session dates are Tuesday, October 22 - Friday, October 25, 2024. Please register for the [NEMESIS meeting](#) before August 31, to secure the early bird rate. Please also use the group block hotel rates at the [Sheraton Park City](#).

The [invitation letter](#) and draft [agenda](#) are available on the website. We encourage you to use the letter to start your request for travel. We look forward to your participation at the meeting.

Stakeholder Engagement

v3 Implementation Calls

[June 12: v3 Implementation Call](#)

Attendees: 96 (Representatives from 18 States and 24 Vendors)

[June 26: v3 Implementation Call](#)

Attendees: 102 (Representatives from 17 States and 27 Vendors)

Upcoming NEMESIS v3 Implementation Calls

v3 Implementation Calls are held on the 2nd and 4th Wednesday of each month from 9:00 – 10:30 AM (MDT)

The next call dates are:

- July 10
- July 24 - Cancelled: Pioneer Day is observed as a state holiday in Utah.

Link to join: <https://utah-health.zoom.us/j/8085088855>

NEMESIS Public Training

The NEMESIS Public Training was held on Tuesday, June 11, 2024. The webinar “Understanding the Correlation ID in NEMESIS v3.5.0,” was presented by Jen Correa, NEMESIS Business Data Analyst and Josh Legler, NEMESIS Consultant. The purpose of the webinar was to provide EMS stakeholders with an overview of the significance of the Correlation ID within the NEMESIS standard. The webinar aimed to enhance stakeholders understanding of the role, usage, and distinctions from the UUID in the latest version. The session provided valuable insights into the operational and technical aspects of Correlation IDs. We encourage you to review and share the [June Public Training](#).

Presentations

Members of the TAC team made presentations at the following meetings:

- National Emergency Medical Services Information System (NEMESIS) Update. Federal Interagency Committee on EMS. June 5th, 2024.
- NEMESIS Analytic Tool & Dashboard for Real-Time Surveillance of Motor Vehicle Crashes. DOT Motor Vehicle Crash SME Advisory Council. June 27, 2024.
- EMS Data: Traffic Crash Epidemiology and Post-Crash Care on Rural Roadways. DOT regions 8 & 10 Rural Road Safety Peer Exchange. June 12, 2024.

v3.4 and v3.5 Data Submission Summary

The NEMESIS TAC collaborates with State Data Managers and Software Vendors to ensure complete and timely data submissions to the national EMS database. Several States are currently submitting data using both the v3.4 and v3.5 data standards.

The counts listed below represent activity from January 1, 2024, through June 30, 2024. The information for unique ePCRs is based on Unit Notified By Dispatch Date/Time.

State submissions using the v3.4 standard were 6,782,190 records from 6,468 agencies. State submissions using the v3.5 standard were 18,100,723 records from 9,911 agencies.

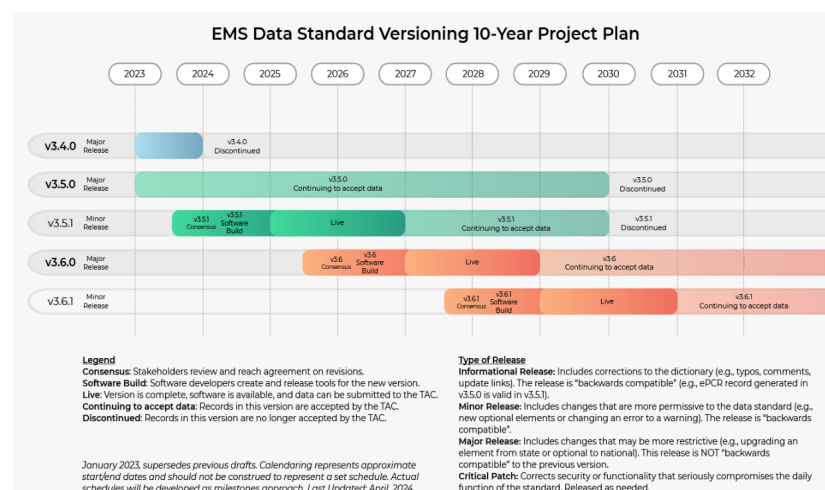

The reporting dashboards are all currently reflecting v3.4 and v3.5 data together. The national average failed submission rate for v3.4 and v3.5 data submissions is 0.76%.

As the development teams continue working on updates to v3 dashboards, we will share the updates on future v3 calls, public trainings, and in the monthly report.

NEMESIS Revision Information

NEMESIS stakeholders requested information regarding v3 versioning and [When Will The Changes Take Place?](#) The TAC updated information on the website to address questions about the next phase of revisions to the data standard. New information includes:

- How to export the public Jira tickets associated with the change requests.
- How to review the estimated timeline for the v3.5.1 revisions and see brief explanations of the types of changes in a minor revision.
- How to review the survey results, which helped determine which changes were approved.

v3 Data Use Agreements

The TAC is diligently working with States and Territories to execute the [NEMESIS v3.5 DUA](#). If you are currently submitting v3.5 data to the TAC or are preparing to submit v3.5 data, we kindly encourage you to work with the appropriate officials to complete the execution of the DUA agreements.

The TAC receives assistance from the University of Utah's Office of Sponsored Projects (OSP) and the University of Utah's Privacy Compliance Office for the review of all legal modifications to the standard DUA.

The DUA has been reviewed by the EMS law firm Page Wolfberg & Wirth LLC and approved by the National Highway Traffic Safety Administration (NHTSA).

The NEMESIS TAC contact to start this process is Monet.Theanacho@hsc.utah.edu

State Data Manager Training

The TAC launched a new State Data Manager Training Course. This resource is a valuable tool for State Managers and other EMS stakeholders, allowing individuals to learn about the NEMMSIS standard in a self-paced online course. The course features 3.5 hours of video content, providing comprehensive insights into datasets, Schematrons, dashboard subscriptions, rectifying failed records, and report generation. Additionally, it includes a guided tour of the NEMMSIS website, highlighting key documents and resources.

The course also introduces participants to key organizations like NHTSA, NASEMSO, and NEMSQA, explaining the significance of these organizations and how they can support professional development.

Interested individuals are encouraged to fill out a form for the [State Data Manager Training Course](#) to obtain login credentials for accessing the course, hosted on Moodle, our learning management platform. We eagerly anticipate your feedback upon course completion and invite you to share this opportunity with colleagues who could benefit from this training.

Website Updates

The NASEMSO Data Managers Council released the [May 2024 Extended Data Definitions](#). The resource provides extended standard definitions for many NEMMSIS elements, to clarify ePCR documentation. This document can be found on the NEMMSIS website under the Technical Resources, Data Dictionaries & XSD tab.

Please take a few minutes to review this valuable resource.

If there are additional elements you would like the NASEMSO DMC to consider adding to the Extended Data Definitions document, please have a discussion with your State EMS Data Manager or submit a ticket to the NEMMSIS TAC Help Desk.

Okta User Accounts

The TAC implemented a security policy update for Okta users. The new password policy requires Okta users to **reset passwords every 60 days**. This change is to maintain a strong security posture.

All user accounts are managed through the Okta service and require dual authentication using your cell phone via the Okta Verify App.

If you need to reset your Okta user account, please use the [Forgot Password](#) link located in the footer of the NEMMSIS website.

If you change cell phones, the NEMMSIS TAC must deactivate the old phone from your user account and establish the new one on the Okta Verify App.

The updated [NEMMSIS User Account Policy and the Guide for Okta](#) are on the website.

If you have other issues related to the Okta accounts or can not access the NEMMSIS reporting resources, please submit a [Help Desk Ticket](#) and choose General NEMMSIS Questions from the options.

State EMS Data Managers and Software Vendor companies are responsible for maintaining the list of authorized individuals who have access to their restricted data. Please notify the TAC when an Okta account needs to be disabled.

v3 Software Vendor Compliance

The [V3 Compliant Software Testing Status](#) page only reflects v3.5.0 compliant software products. The TAC no longer accepts applications for v3.4.0 compliance and has removed the links for these vendor-compliant products. A list of all NEMMSIS-compliant software products and companies seeking compliance can be found on the website.

**Public-Release
Research
Dataset**

[NEMESIS 2023 Public-Release Research Dataset is Now Available](#)

The NEMESIS 2023 Public-Release Dataset is a subset of the National EMS Database and is requested by researchers nationwide. The TAC approved 35 dataset requests in June. The 2023 dataset includes 54,190,579 EMS activations submitted by 14,369 EMS agencies servicing 54 U.S. States and Territories.

The dataset is the largest publicly available resource of emergency medical service activations in the United States. We appreciate all states and vendors for helping us make this resource possible.

The Public-Release Research Dataset aims to improve understanding of, confidence in, and support for EMS data collection and the analysis that will lead to improved patient care. The timely submission of patient care records to the national EMS database helps policy makers and leadership make informed decisions about resource allocations and other time sensitive decisions.

Those interested in requesting a copy of the 2023 Public-Release Research Dataset can fill out a [request form](#).

Once the research request is approved, researchers will be provided a link to the dataset, the 2023 NEMESIS Data User Manual, the NEMESIS Data Dictionary, the Extended Data Definitions, and Sample SAS code.

State Support

The NEMESIS TAC provided one-on-one support via webinars to eight State EMS Data Managers and Directors to discuss data submission, data quality issues, or other concerns.

If you are interested in this type of assistance please submit a [Help Desk Ticket](#) found in the footer section of any page on the NEMESIS website.

We are happy to assist you with any questions.
